**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election of Species I covered by Figure 1, claims 1-8 in Paper No. 7 filed on 2/28/2003 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. Claim 9 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 7 filed on 2/28/2003.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim 3 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Art Unit: 2612

Regarding claim 3, there is no disclosure to describe the newly added limitation "... *another reference operation angle* ...". In line 14, claim 3 recites the limitation "a reference operation angle", and in lines 18-19, the claim adds the new limitation "another reference operation angle." This indicates that the claim requires two reference operation angles. However, the specification, pages 15-16, and Figure 5 disclose only one reference angle  $\theta$  m. There is no disclosure of the "another reference operation angle".

***Allowable Subject Matter***

5. Claims 4-5, 10 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 4, the prior art of the record fails to show or fairly suggest a video camera pivoting apparatus comprising wherein said joystick mechanism includes reaction force generation means for generating a reaction force such that said reaction force increases at a third rate with respect to an operation angle of said joystick mechanism when said operation angle is not greater than a reference operation angle and at a fourth rate with respect to said operation angle of said joystick mechanism when said operation angle is greater than said reference operation angle, said fourth rate being greater than said third rate in order to inform the operator that said value of said pivoting speed command signal increases at said second rate.

Claims 5-6 are allowable for the reason given respect to claim 4.

Regarding claim 10, the prior art of the record fails to show or fairly suggest a video camera pivoting apparatus comprising said pivoting speed command signal generating means

Art Unit: 2612

having a joystick mechanism to generate said pivoting speed command signal such that a value of said pivoting speed command signal assumes a maximum value when said operation angle of said joystick mechanism is greater than a reference operation angle and is smaller than a maximum operation angle of said joystick mechanism.

***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
